Subject: Kaiser, OR Mercury Release

At approximately 15:00 PDT the Salem Fire HazMat requested EPA assistance in assessing the release of an estimated two cups of elemental mercury to an apartment complex parking area, from an unknown source, in Kaiser, Oregon. OSC Fowlow and two STARTS are currently mobilizing to the site to determine the nature and extent of contamination, and oversee the cleanup as necessary. More information will be made available after the initial "on-site" investigation and assessment.
